

## Excel Performing What If's

Tami Norris, MBA  
Northwest State Community College

# Participating by Webinar

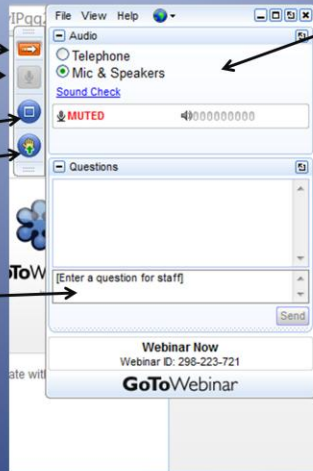

Expand/Collapse control window

Mute/Unmute

Max/restore presentation window

Raise/lower "hand"

Ask a question

Participation method if choose telephone phone# will show

## Webinar How To's

- Your phone/microphone will be muted throughout the session as background noises can make it hard for others to hear
- Please use the question panel, it will be monitored during the session

# Agenda

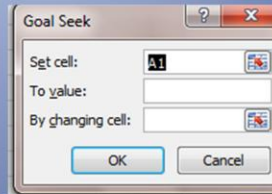

- Good data set
- Goal Seek and Solver
- Scenarios

## Good Data

- Define a data area
- No blank rows/columns
- Title row
- Consistency

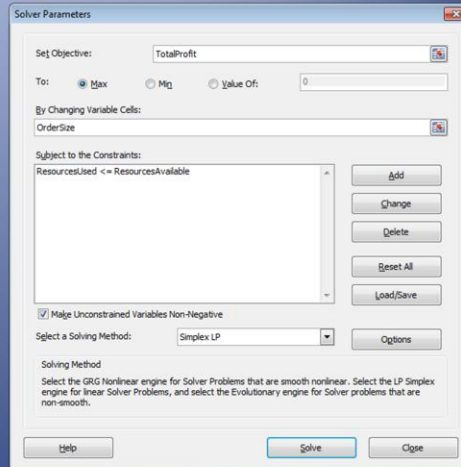

# Goal Seek

- 1 variable
- Solve for your answer

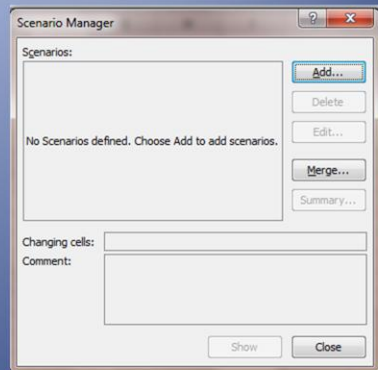

# Solver

- Multiple variables
- Solve for your parameters

# Scenarios

- Stored with file
- Allow to keep multiple data sets and display
- Can create an analysis of the data sets
- “A scenario can have a maximum of 32 different values, but you can create as many scenarios as you want.”
